

REIMAGINING SCHOOL READINESS

Growth Mindset

Growth mindset is believing in the power of your brain to grow and learn! A growth mindset is a strong predictor of school success.

- Teach children that the brain is elastic; it can grow and stretch over time.
- Praise process! Be really specific in the types of praise you use. Praise the strategies children use so they understand they can successfully repeat these strategies.
- Normalize failure. When you make a mistake, you learn from it.
- Celebrate children facing their challenges.
